Pilot lines **ISOTEX®**

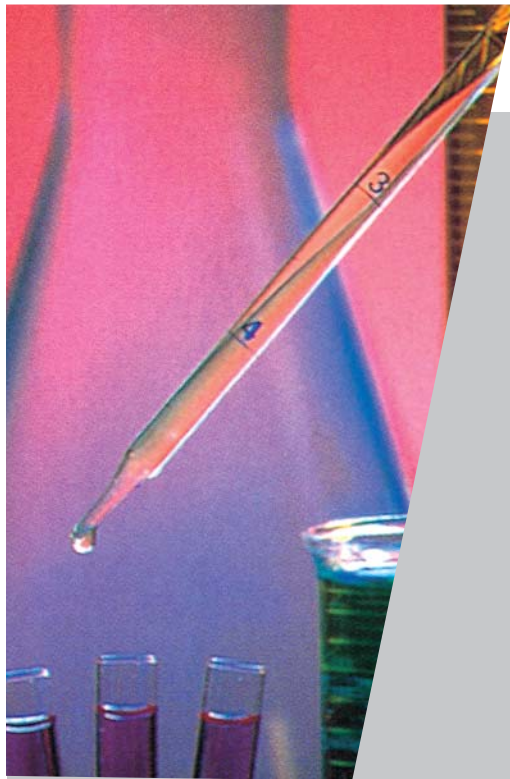

Tradition is our strength - Innovation is our mission

**Laboratory and pilot lines for coating, impregnation, lamination, printing: effective production tests**

Isolab is designed for the production of samples of a very wide range of products and setting of real production parameters. Isolab flexible configuration allows the users to match physical and mechanical specifications of the final products.

Production samples can be light-coated fabrics for clothing, synthetic leather items for technical application (automotive sector, sport sector, footwear), foams, impregnated fabrics and non woven fabrics, wall paper, cast PVC films and other films, self-adhesive products. Isolab can be easily configured to include different technologies for coating as knife coating, kiss-roll, reverse rolls and impregnation, wet lamination, one coat lamination, embossing with heated rolls and cooled rolls, etc.. The oven is suitable to process water and solvent base products. Special features can be added for articles tests of products for the medical sector under clean room conditions.

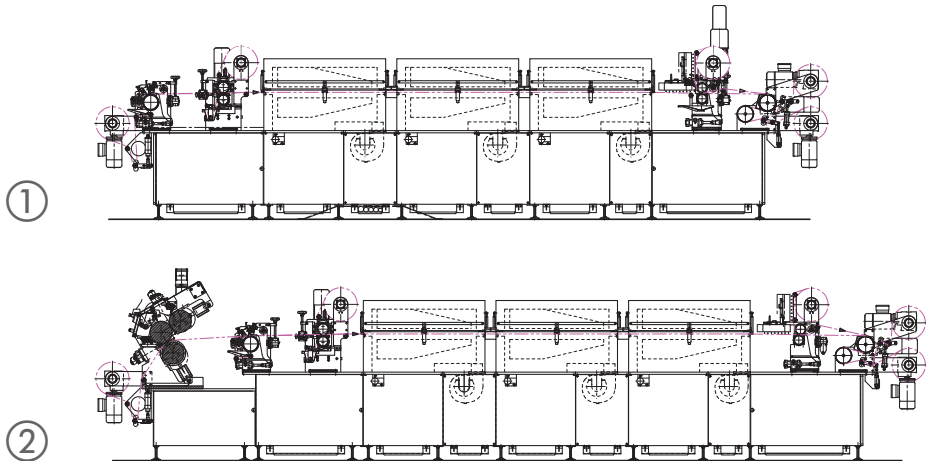

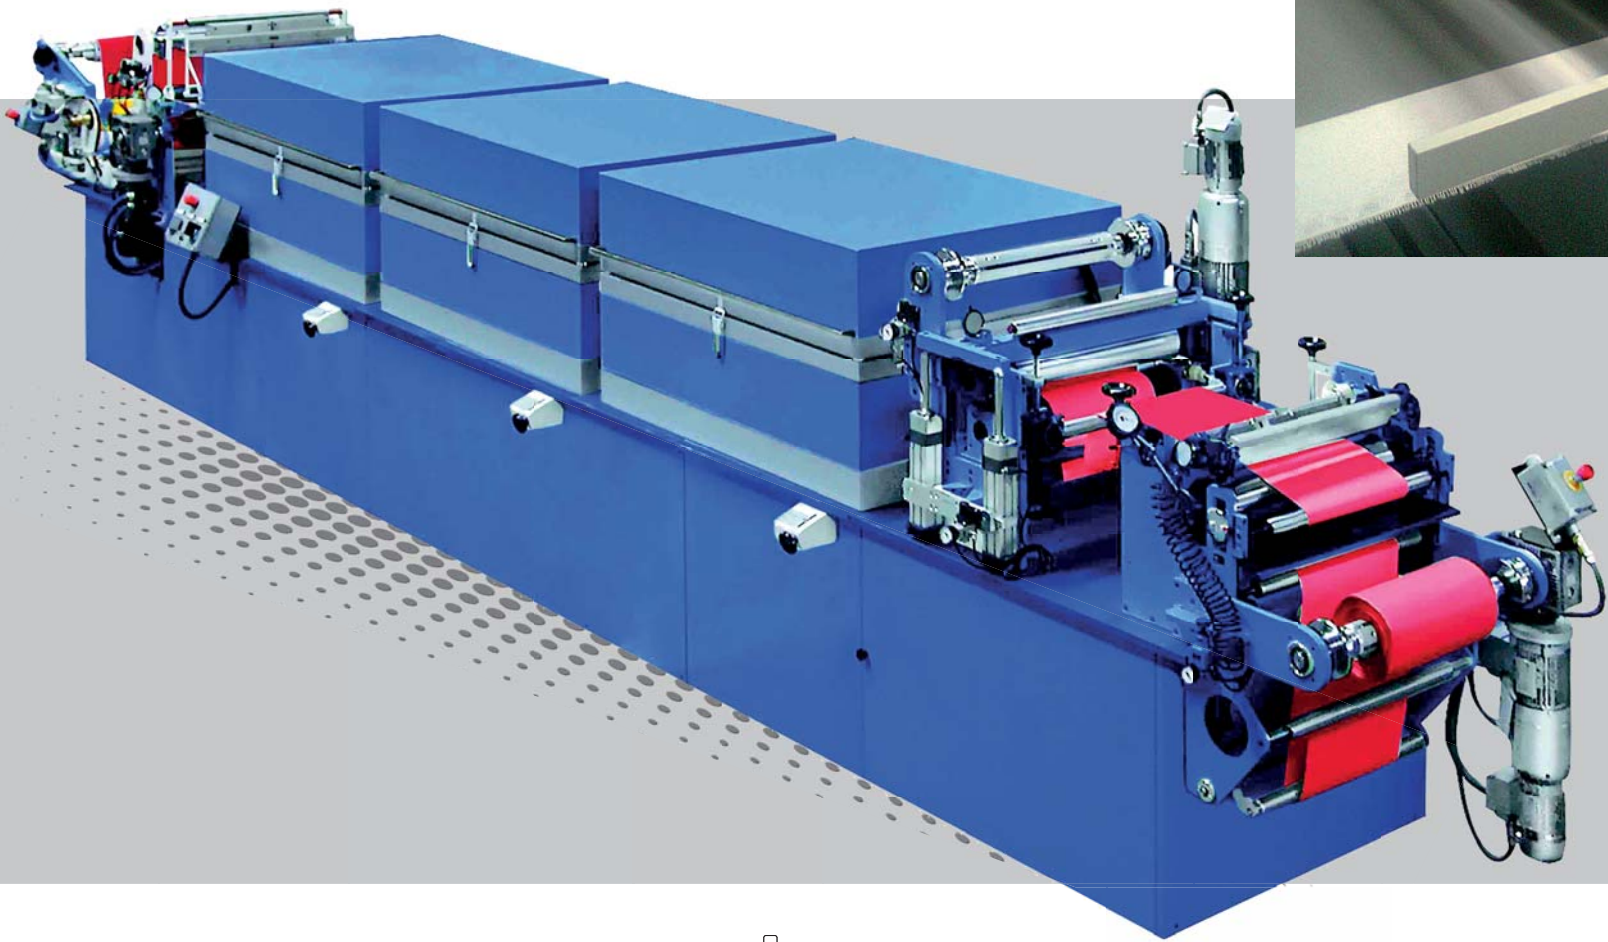

**Main Features**

**USER'S FRIENDLY SOLUTIONS** to allow the operators to carry out efficiently the production of test samples and to change easily from one process to another.

**QUALITY and ACCURACY** guaranteed by precision coating and the optimal control of the products in the entire production process

**FLEXIBILITY and EFFICIENCY** to perform low cost production tests and setting of parameters without affecting ongoing production on main line.

**SMALL PRODUCTIONS** for niche markets can be performed using an Isolab line.
