Fiberglass fabrics  
for technical use

**ISOTEX**<sup>®</sup>

Tradition is our strength - Innovation is our mission

Fiberglass fabrics for technical applications

Isoglass is designed to the production of fiberglass fabrics for different technical for marine applications, fabrics and mesh for the building industry, insulation, circuits boards, architectural membranes, blinds and sunshades as well as a wide range of pre-preg products ready to be processed.

PTFE on fiberglass fabrics and mesh is used for technical products as architectural membranes, belting, insulation and application in the electronic, energy and chemical sectors.

A wide range of chemical products can be processed with the use also of fabrics made by aramide and carbon fibers yarns.

Lines can be implemented with solutions for coating and impregnation, direct and transfer coating, lamination before and after the drying oven, lamination with hot rolls.

Main Features

- FLEXIBILITY:** to obtain the widest possible range of items with the most cost effective investment and easy change of production.
- HIGH-PRECISION COATING AND IMPREGNATION:** to achieve high quality standards in the production.
- MULTIPLE CYCLE PRODUCTION:** continuous production with close "loops" and double-sided resin/ coating systems guarantee maximum efficiency of the production process.
- QUALITY AND ACCURACY:** coating heads with a special "Variable Linearity Blade" ensure coating precision at micrometric level.
