Plug and play

Machines for technical textiles

CAVITEC®

CAVIMELT P+P

Plug and play

- » CAVIMELT P+P is a compact machine developed with the goals of precision, production and cost effectiveness in Hotmelt coating and lamination using an engraved roller.
- » Integrated within the machine frame are both the un- and re-winder, accepting rolls up to 600 mm in diameter.
- » Conversion to the alternative tensionless contact unwinding mode is performed simply through removal of the quickly detachable brush expander rollers.
- » Deliverd pre-wired, assembled and tested, production start-up is very fast.

Different patterns available (round dots, pyramidal, nets, lines, etc.)

Advantages of CAVIMELT P+P

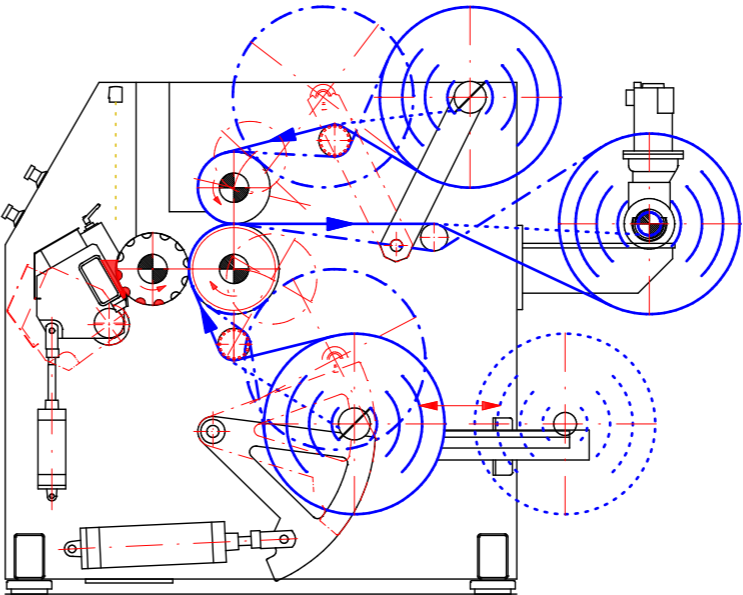

- Compact stream lined machine with rotogravure system
- High production and cost effectiveness
- Unwinders and rewinders are integrated in the machine frame
- Short and easy installation thanks integrated control system and compact design
